

Highland

Peak to Peak Charter School buses are going electric!

Peak to Peak partnered with Highland to deliver Colorado's first All-Electric School Bus Fleet

PEAK TO PEAK CHARTER SCHOOL ELECTRIC BUSES BY THE NUMBERS

~20k planned electric miles for 2023

5 electric buses

213 students riding electric daily

5 electric chargers

Why electric school buses?

Healthy Students

Emissions-free vehicles mean better air for students, drivers, and communities.

Reliable Vehicles

Simple and reliable electric motors are proven to work in the heat, rain, and snow.

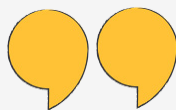

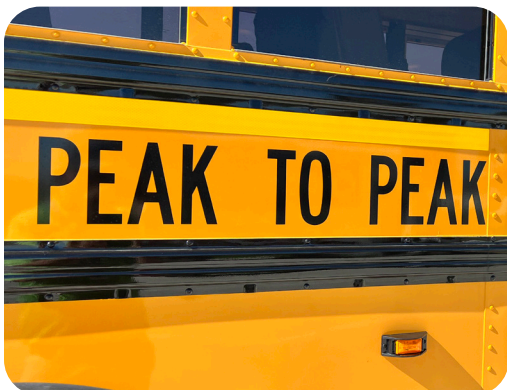

Stable Budgets

Charging with electricity insulates community budgets from volatile diesel prices.

What does an electric school bus project look like?

Peak to Peak drives their normal routes and plugs in the buses. Highland does the rest:

- Engineering, design, and construction of the depots
- Installation & repair of charging stations
- Electric bus purchasing, charging, & maintenance
- Driver & mechanic training

“Without the expertise of Highland Electric Fleets, we would not have been able to build an electric bus fleet from the ground up. Their knowledge of this new electric bus frontier and the grants available are what make the program affordable. **It is a dream come true for us.**”

Sam Todd,
Executive Director of Operations, Peak to Peak Charter School
